Log Out of Learning Resources on a Shared iPad

Students appear to be fully logged out of a Learning Resource when using a shared iPad. However, when another student accesses the Online Learning Resources, the previous student is still logged in. To prevent this, the iPad’s browsing history must also be cleared after a student logs out of any Learning Resource. These directions explain how students log out of a Learning Resource and clear the browsing history on a shared iPad.

Note: Some screenshots may vary depending on the selected Online Learning Resources.

1. Student should log out of their Online Learning Resources by **clicking on the icon or the student’s name in the upper right corner and choosing Logout.**

   Note: Log-out screens vary by the online Learning Resource.

2. At the logout confirmation screen in Safari, **click on the Bookmark icon.**
3. **Click the clock icon** to show the student’s recent browsing history.

4. **Click Clear** located at the bottom of the screen. Then **select All time**.

5. **Close the Safari Browser** by clicking the Home Button twice, and swiping up to fully close the browser.

Once you have cleared the history and closed the Safari browser, the student will be logged out of the Online Learning Resource. Another student may now access with his or her login information.
