

Iowa Assessments

Test Brief for 2016–2017

Cobb County School District

In September of 2016, the Iowa Assessments were administered to all Cobb County School District students in grades 3, 5, and 7. The Iowa Assessments are norm-referenced tests, which allows the performance of Cobb students to be compared to performance of students from across the United States. Students take the Iowa Assessments over the course of four school days in the subjects of reading, English-language arts, math, science, and social studies. In this test brief, scores for each subject are reported using two measures: (1) national percentile rank and (2) grade equivalent.

National Percentile Rank

National percentile rank (NPR) communicates how a student’s performance compares to students who took the test across the United States. A NPR of 60% means that the student scored better than 60% of the students who took the test nationally. Nationally the average NPR is 50%.

Grade Equivalent

Grade equivalent (GE) communicates how a student’s performance compares to how far along they are in school. GE is a decimal number. The digits before the decimal represent the grade level, while the digits after the decimal represent the month in the school year. Thus, a GE of 3.6 means that on the grade 3 test the student performed equivalent to what is expected for a student in the sixth month of the third grade. The test was taken during the second month of school.

Data Provided in this Test Brief

Table 1 contains the district averages for each core subject on the Iowa Assessments for grades 3, 5, and 7. In all tables in this document, the 2016–2017 school year is listed as 2017. A similar descriptor is used for the other school years. Tables 2–6 contain the NPR and GE averages for each school on the reading and language arts sections of the test for the 2016–2017 school year. Tables 7–11 contain the averages for each school on the math sections and the core composite score which is a combination of all ELA and math sections. Tables 12–16 contain the results for each core subject and the complete composite score which is a combination of all sections of the test. Tables 17–21 show the reading scores for each school for the last 4 school years. Tables 22–26 show the math total scores for the last 4 school years.

NPR and GE are Student-based not School-based Measures

The NPR and GE measures reported in this brief for the district and for schools are not based on comparing school or district averages but on individual student scores. Therefore, the district and school NPR and GE in this brief should be thought of as the NPR or GE of the typical student in the district or school. An NPR average of 60 for a school does not indicate that the school performed better than 60 percent of the schools in the nation. Rather, it indicates that the typical student in the school scored better than 60 percent of students in the nation.
