

Welcome to ActivInspire

Inspire Concepts

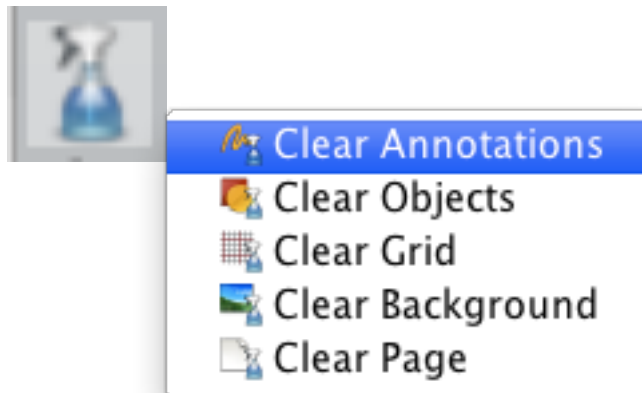

Vocabulary: Annotate means to write!

The Anatomy of a Flipchart

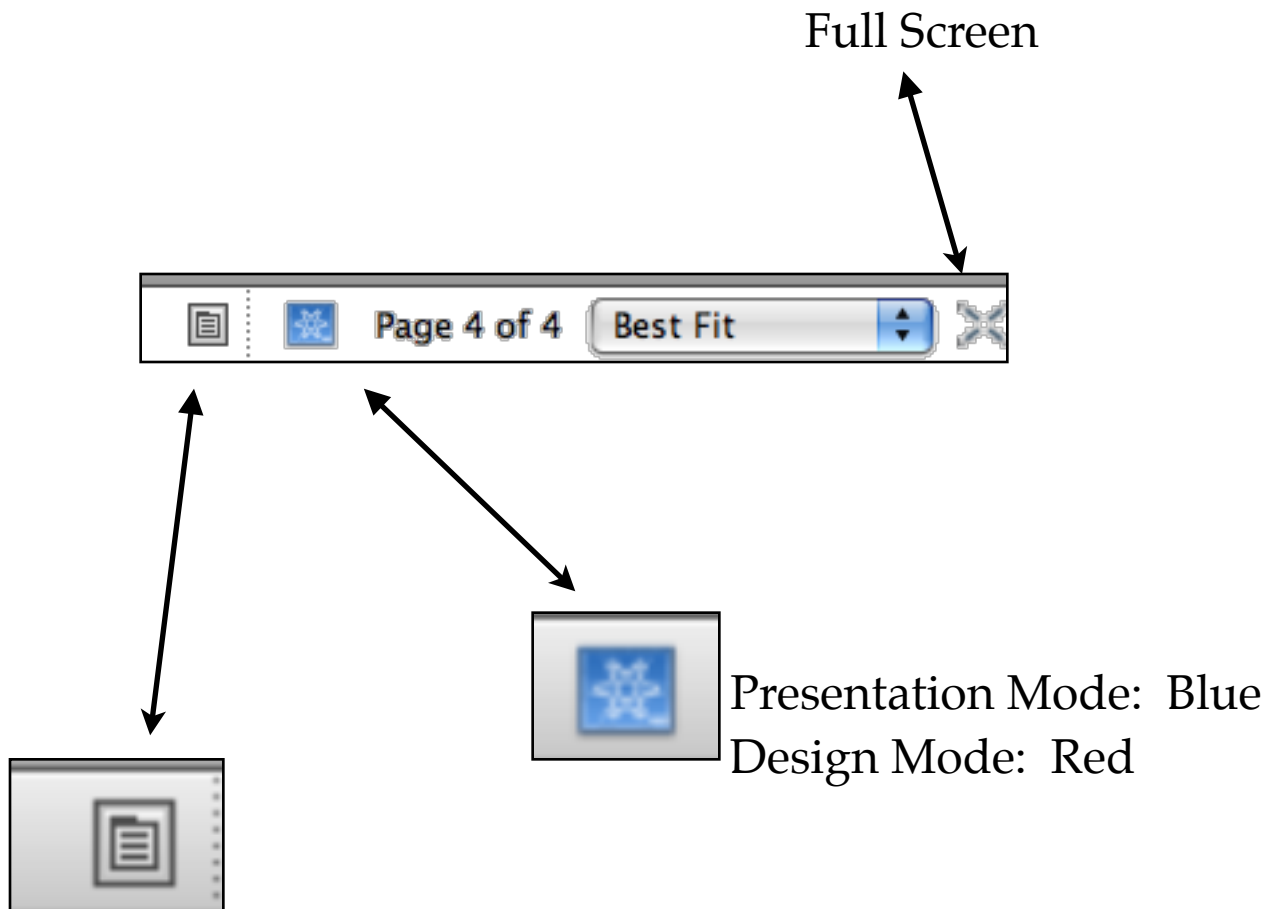

Top Layer	Pen, Highlighter, Eraser, Magic Ink
Middle Layer	Objects, Text
Bottom Layer	Backgrounds

The Spray Bottle Tool allows you to clear entire layers at one time.

Upper Right Corner Menu

Options: This icon can be seen in many places!

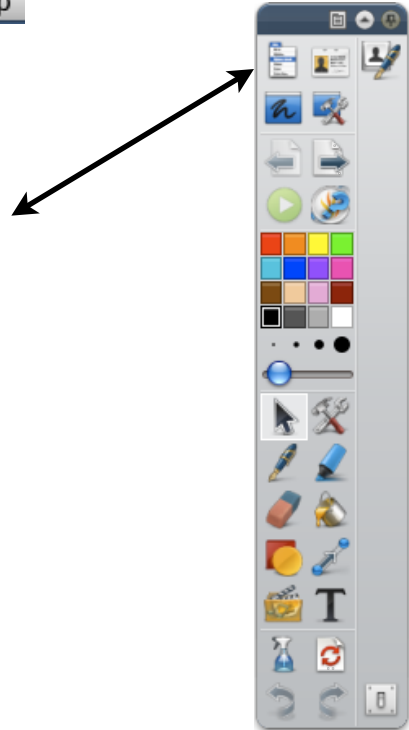

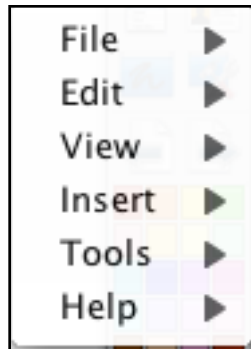

Example: Top of toolbar, Top of Browser window, page thumbnails, etc.

Menus

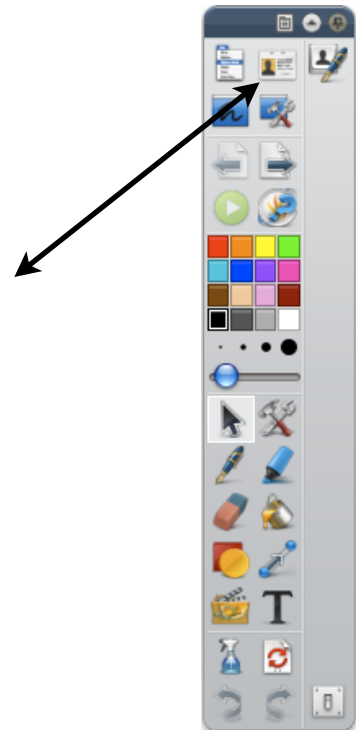

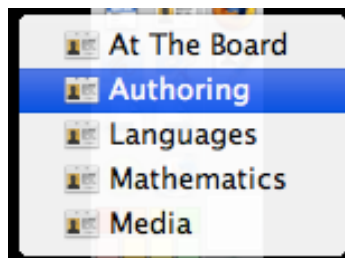

Inspire is completely menu driven, so it should look much like any other application you have used before.

Profiles

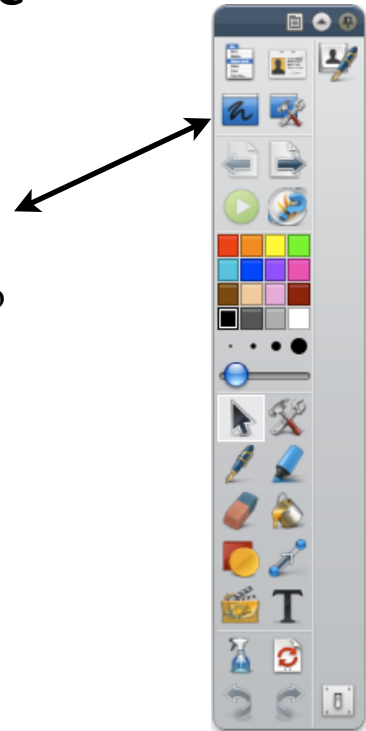

Profiles allow you to customize toolbars for different subjects.

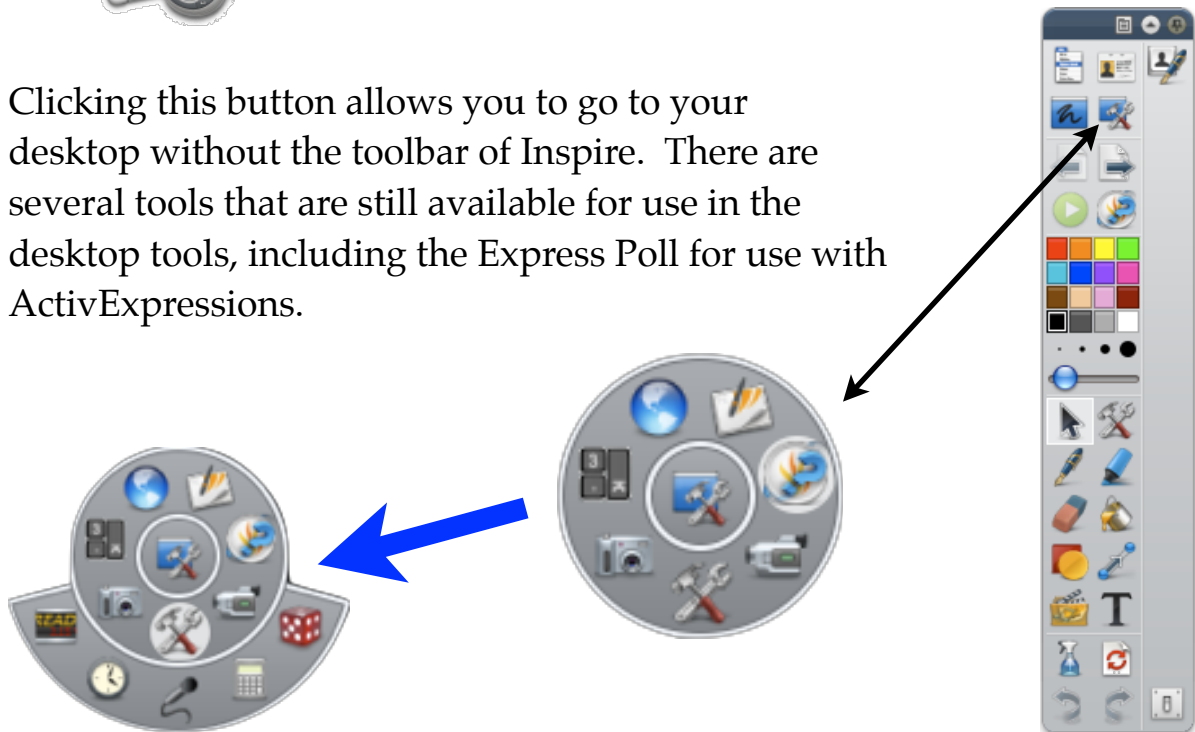

Desktop Annotate

Clicking this button allows you to go to your desktop with the full functionality of the Inspire toolbar. Most teachers use this when they want to write or highlight something that is not in ActivInspire.

Desktop Tools

Clicking this button allows you to go to your desktop without the toolbar of Inspire. There are several tools that are still available for use in the desktop tools, including the Express Poll for use with ActivExpressions.

Browsers

The Browser window has NOTHING to do with the internet! It holds all of the functional support for creating flipcharts.
