

MyBib

Automatically create your MLA formatted works cited page!

Getting Started

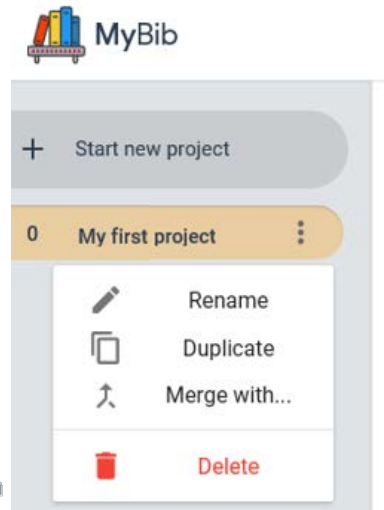

- Go to MyBib.com and login using your Google account, or create a free account
 - Keep track of the login credentials that you use *so you will not lose your work!*
 - Email address:
 - Password *hint*:

- Select *Start a new project* in the upper left, or use *My first project*
 - you can **rename** a project by clicking on the three stacked dots that appear at the right when you point to the label with your mouse
- Confirm that the style is set for *MLA 8 (Modern Language Association 8th edition)*, which is the default setting

- Select **+ Create Citation** at the top and then click on the type of resource:

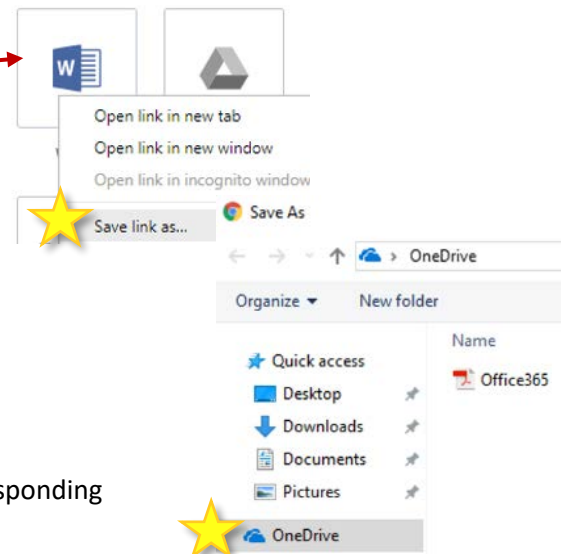

- Select **More** and **Write/paste citation** to enter a citation copied from a database

Getting Your Formatted Works Cited Page

- Click the **Download Bibliography** button on the upper right
- Right-click on Word** and select **Save link as...**
 - Click on **OneDrive** (open any folder that you are using for your project)
 - Enter a *meaningful file name*
- Add your name and header information, as directed by your teacher, or copy and paste the content to another document
- Print or submit a digital copy

Help with In-Text Citations

- Click on the  icon to the right of a citation to copy the corresponding in-text citation
- Paste the in-text citation following quotes or paraphrased information from the cited source
 - Use the proper punctuation for parenthetical in-text citations: “ _____ ” ().
 - Include page number(s) when available, for example: (Bryan 27) or (Bryan 18-19)
