

CCSD Wireless Instructions

- Turn on **airplane mode** and then turn on your wifi
- Choose the **CCSDWireless** network
- Use initial password **cobb2019**
- Open any web browser and go to cert.cobbk12.org
- Enter your student number for the username and your personal password
- Read and accept the acceptable use policy
- Click sign-in
- Click the key to install the CCSD issued SSL certificate
- iPhones have a couple additional steps on the next slide

CCSD Wireless Instructions - iPhone Users

(do previous slide directions first)

iPhone users need to also do the following:

- Click to Install the CCSD Root Authority Profile
- Once installed, click Done
- Go to the Settings application
- Select General then About
- Scroll down to Certificate Trust Settings
- Turn on the CCSD Fortigate Root Authority and exit settings
- Now you're done!

CCSD Wireless Troubleshooting

CCSD Wireless will NOT work if phone is...

- Jailbroken
- Rooted
- You have a VPN installed

Check that you have properly followed all device specific instructions

- Go to the [ManeMedia.info blog](http://ManeMedia.info) to access the link to [FAQs](#) for your device
- Find the video that shows you how to **install and trust the SSL Certificate** (If applicable, the video link is usually under the second bullet)
