## ACADEMIC RESOURCES

### Exploring Our Website

I am excited about continuing to grow as a digital-age school. From our staff members who are currently in the Microsoft Innovative Educator Certification course to our staff members who continue to use technology to augment their instruction, we have numerous ways that technology is currently being integrated into what we do. To help use the technology we currently have to further support our academic goals in the classroom and on state assessments, we are working to build the "Academic Resources" link on our website.

Based on the feedback from our parents at our last Lunch 'N Learn, we have just added typing resources to our resource page as well. Currently, on the "Academic Resources" page you can find the grade level study guides for the Milestones, end of course study guides for high school physical science and math, and USA Testprep links, study skills tips, and 8 grade transition information. Please keep your suggestions and feedback coming! With the Milestones being administered online this year, it is important to ensure our students are comfortable with typing. The new typing resources are great additions to our students' resources.

### Did You Know?
